

STEAM SUMMER CAMPS 2019

Coding, Jr.

June 10-13 @ Marshall Primary
Rising Kindergarten-2nd Graders
Andrew Swift & Ashleigh Marcie

It's hard to imagine the jobs our youngest learners will have when they are older, but we can be sure, many will require technology! Understanding and being able to work with technology, especially at a young age, helps prepare our students for their futures. This camp will be full of fun activities that help build a foundation of computational thinking and computer science. Even pre-readers can learn to code using awesome apps like Tynker and Scratch! Students will use code to control robots through mazes - we even have robots that can be coded by drawing with markers! Students will work creatively, collaboratively, and problem solve all week long - all while having a ton of fun!

Coding Crash Course

June 10-13 @ Marshall Primary
Rising 3rd-8th graders
Beth Dabney & Matt Dabney

Explore coding using a variety of technologies including building worlds in Minecraft, coding stories and games in Scratch, programming robots using Sphero and Ozobots, designing interactive virtual and augmented reality environments in CoSpaces, and creating 3D models in Tinkercad. This summer we will take it up a level or two and move beyond block-based coding to some more common coding languages, for example JAVA. This camp is always a blast...if you love technology, this is the camp for you!

LEGO My Art!

June 17-20 @ Marshall Primary
Rising Kindergarten-5th Graders
Katherine Dobbs & Ayana Mattress

Art + Legos = a week of fun! Artists will spend time exploring how we can combine art skills with Legos to make amazing creations! We will be creating our own Lego bricks out of colorful clay, painting our own Lego minifigures onto canvas, printmaking with Legos, and building 3D Lego creations. Throughout the week, we will conduct different STEAM experiments together, such as trying to create a Lego parachute that flies and a Lego boat that floats! How about we make some Lego slime for fun, too?! Students: Bring your imagination, and I will have the Legos and art supplies ready for you to create with!

Camps run Monday-Thursday

8:30-2:30 @ Marshall Primary School

\$115
per camp

Lunch
& Snacks
Provided

our camps!

Cooking

June 17-20 @ Marshall Primary
Rising 3rd-8th Graders
Ginny Burt

The kitchen is getting hot! We hand the wooden spoons over to YOU to read the recipes and create some show stopping meals. Each day campers will prepare a dish to bring home and share with the rest of the family. On the last day, parents and guardians are invited to join in a feast as these young chefs share their favorite recipes.

DIY Jewelry & Charms

July 22-25 @ Marshall Primary
Rising 3rd-8th Graders
Dawnyelle Moore

Artists will spend the week learning how to make different beads, stringing techniques, and the creative process of designing and making their own jewelry. From paper beads to clay pendants. From earrings to bracelets. Create your own style with a line of jewelry made for you, by you.

Please contact kmurray@asd2.org with any questions you may have.
